

CARE PATHWAY ANALYSIS

EXPLORE THE IMPACT OF CHANGES TO YOUR CARE PATHWAYS

If you want to implement changes to your care pathways, make efficiency savings, improve patient care, or futureproof provision for an aging population, explore all your options with Care Pathway Analysis from **CORDA**.

Working in partnership with you, we build a simulation model of your existing care pathway and add the planned changes you wish to investigate. You can clearly see the effect of plans on your costs and patient outcomes before you commit precious funds.

The Big Questions that Care Pathway Analysis can help answer:

- > Will my planned strategy have the impact I expect?
- > Will it be cost-effective?
- > What combination of strategies will give the best outcome?
- > How can I make best use of the resources available?
- > Will the current care pathway be able to cope with projected demographic trends?

CORDA

Delivering Successful Futures

Providing clear understanding of how to improve your care pathways

Benefits:

- > Clear visualisation of the end-to-end care pathways so that even complex pathways can be fully understood and easily explained
- > You gain greater confidence in your plans before committing funds
- > You can optimise pathways as a whole, rather than improving each section in isolation
